

2K²-floor mats

Some members of the Fendt-Tractor family are equipped with the Protoplast-Engineering floor mats. Here are samples of the 200 series

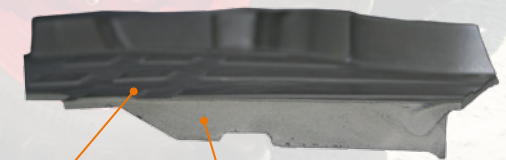

Features:

- optimal acoustical absorption because of “spring – weight – system”
- Optimal sound absorption through „mass – spring system”
- Customized surface coloring and texturing
- Outstanding elongation of break
- Optimal resistant to abrasion
- Chemically resistant
- Neat surface finish
- Protected against water absorption
- VOC and FOG numbers to highest standards

Annual need at Fendt:

> 7000 pcs

mass - PUR-RIM / spring - PUR flex foam

The 2K²-process – evolved by Protoplast-Engineering is also used for floor mats in cabins of some Fendt tractors.
